

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

SCANWORKS® USB-100 BOUNDARY SCAN CONTROLLER

The USB-100 boundary scan controller is a low-cost, easy-to-use and portable hardware interface for ScanWorks® and a unit under test (UUT). The USB-100 can be easily moved from ScanWorks stations in an office to the lab, or it can be used in field service applications where it interfaces a laptop computer to installed systems. Instead of being installed in an internal slot or bay, the USB-100 simply plugs into a USB port on the PC where ScanWorks is running. The USB-100 is based on the USB 2.0 specification that has a much higher throughput rate than USB 1.1. USB 1.1 is supported, but not recommended for most applications.

The compact USB-100 is about the size of a deck of playing cards. Standard, off-the-shelf USB 2.0 mini-B cable connects the USB-100 to a PC, making it easy to transport and connect. A large pod is not needed to connect ScanWorks to a UUT in the field or in manufacturing environments.

The USB-100 package includes the controller, a standard two-meter USB mini-B cable, a 20-pin cable to connect the USB-100 controller to a UUT and an adapter to interface the USB-100'a 20-pin connector to the standard 14-pin connector.

SCANWORKS PLATFORM FOR EMBEDDED INSTRUMENTS

ScanWorks Platform for Embedded Instruments is a seamless software environment to access, run and collect data from any instrument in your chips, circuit boards or systems. The ScanWorks Platform includes products for Boundary-Scan Test (BST), Processor-Controlled Test (PCT), High-Speed I/O (HSIO) Validation, FPGA-Controlled Test (FCT) and IJTAG test.
