May 18, 2016

Dear Customer,

As part of our ongoing product lifecycle management, Racal Instruments™ 3171 Waveform Generator has transitioned into an “unsupported” status. The increasing shortage of replacement components coupled with the older unsupported test equipment and reduction in number of units serviced has made it difficult to continue supporting this line. The status change applies to all “3171” part numbers listed at the bottom of this letter and is effective immediately.

We want to thank you for your business and are committed to providing you with the highest quality products and services. If you have any questions, please contact us.

Sincerely

Sean Forghani,
Manager, Customer Support
Astronics Test Systems
