RAK-100 rackmount kit for the **AUX-0100 Measurement Filter**.

Other Accessories

USB APIB Adapter

For AP 2700 Series, System Two Cascade Plus, System Two Cascade, ATS-2, and various accessories (switchers, DCX-127, PSIA). All APx Series analyzers are connected directly to the control PC by USB and do not need the adapter, though APx uses the USB adapter to control switchers.

- Adapter to connect APIB interface on AP instrument to controlling PC via USB rather than an APIB card installed in the PC.
- Includes USB cable, DB-25 APIB cable and software discs.
- Select option “USB interface” when specifying new instrument or to order separately for existing systems request the “USB-APIB Adapter” from Sales Partner.
- Requires AP2700 v3.30 or ATS v1.60 or later, so it will not work with analyzers earlier than System Two Cascade.

The USB-APIB adapter includes both a USB cable and a 2-meter APIB interface cable, used to connect the interface adapter to the instrument and to daisy-chain accessories such as the PSIA, DCX-127, or switchers. Additional cables of different lengths are also available.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions
