# Multi-Mode HDTV Distribution Amplifier

Model 985U

Discontinued

Feedback

Now discontinued, the 985U takes one source in and provides four outputs of HD component video, composite video, stereo L/R analog audio, and digital coaxial audio.

Categories: Commercial Component, Commercial Distribution, Showroom Video Distribution, Discontinued

- Component video (YPbPr)
- Composite video
- Digital audio
- Stereo analog audio
- Ground isolation switch
- Two bus connection choices: RCA or F-connectors

This multi-mode amp distributes audio and video source material in two formats to multiple TVs - both standard and HDTV. The 985U faithfully distributes high quality video and audio signals from video sources such as DVD players, set-top boxes or digital video recorders. Each Model 985U distributes component video (YPbPr), composite video, digital audio, and left/right analog audio signal to four TVs. Since the 985U is invisible in the signal path, any number of devices may be driven from a single source by cascading multiple 985U modules via the self-terminating signal bus.

Use the bus passthrough to chain multiple amplifiers together.

Product Dimensions: 4.25 x 7.75 (HxW, inches)
