"It's important to me that an IV infusion system provides safeguards to reduce medication errors, while also recognizing the importance of my clinical judgment."

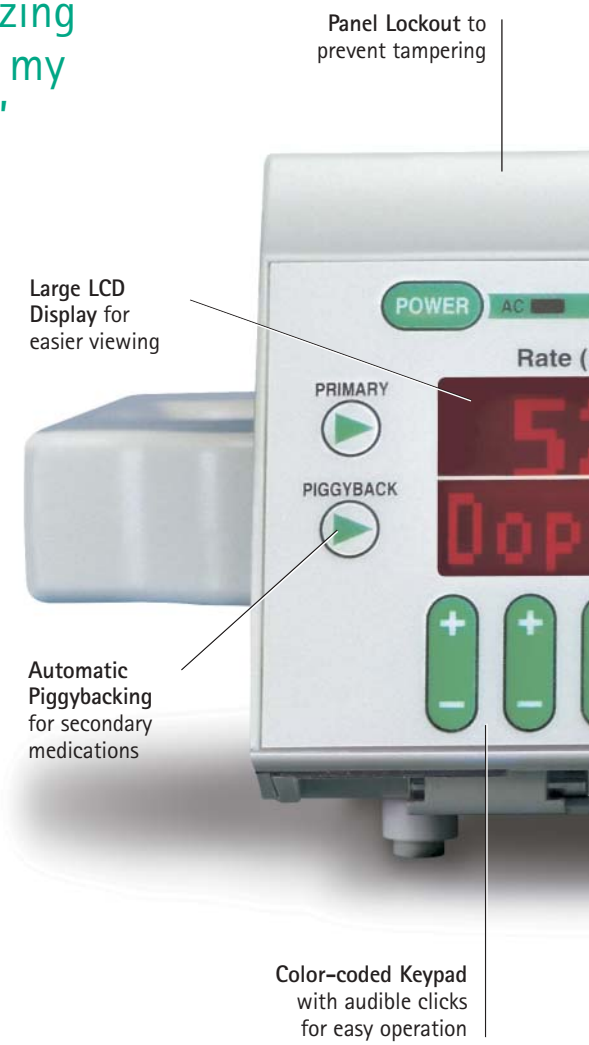

Prevent IV Medication Errors

- Promotes patient safety by helping to avoid accidental under- or overdosing using audible and visual alerts
- Provides flexibility for each care area—ability to customize dose limits to your hospital drug formulary
- Promotes clinician choice with dose limit override when limits are exceeded during manual programming and titration
- Visually indicates dose selection with DoseGuard™ software

The Proper Balance of Safety and Ease of Use

- Easy to learn
  - Manual operation RATE, VOLUME, RUN
  - Automatic Dose Rate Calculator
  - Large, highly visible keys
- Reduce nuisance air-in-line alarms with air-trapping cassette
- Stackable modular design reduces bedside cord clutter and errors due to channel confusion
- Comprehensive line of needle-free administration sets including UV light resistant tubing that protects drug efficacy
