ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

MachineWorks™ The Industry's Breakthrough Direct Machine Controller

- Complete machine control – integrating servo motion, I/O, touchscreen operator interface, and machine connectivity
- Open architecture connectivity to Windows-NT-compliant applications and devices
- Robust integration environment provided on-board
  - · Machine Start-up and Configuration
  - · Operation Programming
  - · Diagnostics and Fault Handling
- Shortens time to market for your machine

MachineWorks is a pre-integrated machine controller designed to unify the control of multi-axis servos, input/outputs, operator interface, and machine connectivity. Berkeley created MachineWorks by infusing a syntax-free software integration environment into our renown integrated machine controller base. Simply put, MachineWorks contains the 70-90% of software common to most machines. Machine operation sequences are developed and executed via our color touch screen interface, eliminating multiple programming languages and minimizing integration effort. A complete solution may comprise the MachineWorks Controller, USA/ASM brushless servo package, touch screen interface, and Micro I/O.

MachineWorks anticipates the total needs of the machine operation—new design or retrofit—and provides access to the most sophisticated functions of this 64-bit RISC-based controller, the highest power and precision platform in the industry. Multi-tasking lets you run up to 20 machine tasks concurrently, simplifying even sophisticated machines.

Why integrate your machine controls from scratch when MachineWorks provides virtually all the hardware and software in a pre-integrated package?
