The SQ-300™. ..Nothing else is even close.

BHA's SQ-300™ AVC is the culmination of over 15 years of precipitator electronics experience, and offers the best available control technology.

Advances in microprocessors and computing have enabled us to develop the most sophisticated and powerful control in the world. The SQ-300 is also the easiest to operate. At the touch of a button, you can access one of six easy-to-read help menus and operating screens. All control functions can be viewed quickly by navigating through the backlit screens.

Maximum precipitator performance is achieved using the following features:

- On-line waveform analysis to evaluate T/R set efficiency.
- Diagnosis screen that warns of problems, then suggests corrective actions.
- Automatic Ramp Rate.
- Adjustable Fast/Search ramp rates.
- Adjustable Background Power Setting.
- Downloadable Set-up Instructions.
- No adjustments or field calibration required.
- Backlit LCD Screen with scratch resistant coating.
- Over 20 Status and Alarm messages.
- Security Features.
- kV Min/Max measurement.
- Enhanced Back Corona Detection and Control.
- Automated I/E Ratio Selection.
- On-board trending of all SQ-300 parameters.
- On-board saving of past alarms.
- On-board saving of V-I curve data points.
- On-board tumbling hammer control.
