Email: order-request@blastronix.com
We except VISA, MasterCard, American Express, Discover, COD, & Net 30 accounts upon approval of credit.
Warranty: In most cases, our reliable products carry a lifetime warranty. See below for details.

General Description

The Blastronix Rs 232/8S PCI card is one of the highest performance 8 port cards on the market today. All 8 port units come with 16C954 UARTS which feature 128 byte transmit and receive buffers (FIFO's) to help guard against loss of data in your busy system. 16C954 UART's can be programmed for automatic hardware and software flow control. The installer software will automatically assign the ports standard device names such as COM1-COM8. Multiple cards may be put into one machine to allow for more than 8 additional ports. This unit will support baud rates of up to 920K baud for your high speed applications such as ISDN modems. Interrupt sharing allows multiple ports on a single card to all use the same interrupt. Each port uses an industry standard RJ 45 Keyed connector.

Specifications:

Blastronix products comply with certifications such as RoHs and Weee. Please inquire for details.

- Part Number: 9220019
- Blastronix Model:.....232/8S-PCI
- Operating Systems.....Win98, ME, NT,Win2k, XP, VISTA
- Businterface:.....PCI-3.3V bus Version 2.2 Compliant
- Serial Ports:.....8 ports
- SMPTE pin-out:.....DTE device
- Transmission speed:.....Up to 920K bps
- Dimensions:.....PCI half card
- Max Data Distance:.....4000 feet/interface dependent
- Operating Temperature:.....0-70 degrees C
- Storage Temperatur:.....-50-+105 degrees C
- Humidity Range:.....10-90% Relative Humidity
