Botron Digital & Analog Surface Test Kit **B8571** is an easy to read a large digital and analog megohm tester. Test up to 200Gegohms (see spec). Also has a (Quick Check) megohm scale on faceplate from $>10^4$ to $<10^{11}$ range Select the desired test range and push the large test button for reading, you may also lock-in your test results by pushing the yellow lock button. When in a low light condition press yellow back-light button. The Auto shut-off feature will conserve the battery life. Optional transducer to test humidity & temperature is available . **Disclaimer.** All statements of technical information are believed to be true and are based upon tests we believe to be reliable. The proper use and application for this product must be the responsibility of the user. The statements herein shall have no force or effect.

PROPERTIES	SPECIFICATIONS
Accuracy range:	+/- 4% per gegohm
Test Range:	100G/100v 200G/500v Analog 20G/100v Digital
Auto Shut off:	Conserve battery
Locking Test:	As needed
Electrodes:	Two (2) 5lbs weights
Read out:	Digital & Analog (instantly)
Test Voltage:	10v, 100v & 500volts
Low battery:	Symbol
Millivolt Test:	+/- 1m-1999mV
Voltage Test	500volts
Water Resistant:	IP54
Dust Proof:	IP54
Designed to:	IEC1010-1
Warranty:	Three (3) years
Back Light:	Auto shut off
Microprocessor:	Controlled
Case:	Foam filled

Insert six (6) AA batteries into compartment on back of tester. Plug test leads in jacks on tester, plug other end into hole on 5 lbs weight. Select test voltage 10volts or 100 volts or 500 if needed. For test below $<10^6$ use 10volts for test over $>10^6$ use 100volts. With it's large digital display and instant reading on the analog scale you will be able to test much faster and more accurately than many other megohm meters on the market today. This unit has three ways to read a test **1.** Analog, **2.** Digital **3.** 10^4-10^{11}ohms scale on the faceplate
