BCM93210 MCNS/DOCSIS
Headend CMTS Reference Design

INCLUDES:

- Schematics and Gerber Files
- Bill Of Materials (BOM)
- Data Sheets
- Software Source Code
- Applications Support

BCM93210 Headend CMTS Reference Design

A fully-functional MCNS/DOCSIS-compliant CMTS reference design, which includes baseline privacy and supports one downstream and up to eight upstream channels simultaneously.

The BCM93210 incorporates the BCM3033 QAMLink Modulator, the BCM3210 QAMLink Media Access Controller (MAC) and the BCM3137 QAMLink Burst Demodulator and an RF Tuner with diplex filter, onto a single, compact PCI board.

The BCM93210 reference design permits manufacturers to immediately begin developing and testing an industry-standard MCNS/DOCSIS cable modem termination system using Broadcom's silicon platform.
