Miniature 10Base Transceivers

MTX/MBX Series

MTX-1070 • MBX-1020 • MFX-1062 • MFX-1062-SM

Miniature 10Base Transceivers features:

- MTX-1070 provides an RJ-45 unshielded twisted pair connection for hookup to a 10Base-T segment.
- MBX-1020 provides a BNC connection for hookup to a ThinNet segment.
- MFX-1062 provides a fiber optic connection for hookup to a fiber optic segment. MFX-1062 is available in two models - one with SMA-type connectors, the other with ST-type connectors.

This family of transceivers provide the user with simple and inexpensive Ethernet connectivity. By making optimal use of stare-of-the-art integrated circuits and surface mount technology, Canary has produced three exceptionally reliable transceivers. All units are manufactured to exacting standards by our ISO 9001 certified assembly plant.

All three units are designed with a low-profile AUI connector. Such compact and lightweight design allows the units to be installed directly to the DTE's AUI port, and compatible with space-restricted DTE AUI ports.
