

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

CBS Isothermal –190°C Dry Storage Freezers

- Patented Isothermal Design
- Outstanding temperature uniformity
- No cross-contamination through liquid nitrogen
- Certified to MDD 93/42/EEC:1993 Class IIA

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

CBS Isothermal -190°C Dry Storage Freezers

- Outstanding temperature uniformity in the -190°C range.
- No loss of storage space.
- No cross-contamination through liquid nitrogen.
- User safety with no liquid nitrogen in the sample storage area.
- Automatic operation and filling.
- Certified to Medical Device Directive 93/42/EEC:1993 Class IIA.
- Choice of 4 models offering capacities between 9,100 and 46,500 2ml vials.

V-3000

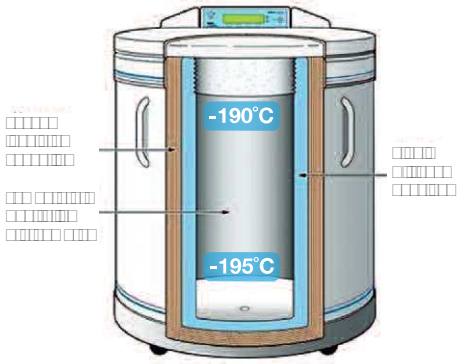

V-1500

CBS Isothermal -190°C Dry Storage Freezers offer a totally new approach to cryogenic storage. The freezers feature a patented liquid nitrogen jacket to provide uniform storage temperatures in the -190°C range, free from liquid nitrogen contact. This innovative design eliminates the risk of cross-contamination through liquid nitrogen and the need for special packaging to protect valuable cells and tissue.

With a minimal temperature gradient, the full internal volume of each freezer is available for storing samples at liquid nitrogen temperatures making the most efficient use of available capacity.

CBS Isothermal Freezers also provide added user safety by eliminating contact or splashing of liquid nitrogen.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

The Isothermal concept

The sample storage area is cooled by a liquid nitrogen jacket surrounding the stainless steel interior, and by nitrogen vapour entering the freezer from the jacket via directional vents.

This patented technology provides exceptional temperature uniformity in the -190°C range, allowing the full freezer capacity to be used with confidence.

The circulation of vapour within the freezer also results in less cold air loss during lid opening and improved visibility. This allows full-width lids to be used providing quick, unrestricted access to sample racks.

No liquid nitrogen contact

With no liquid nitrogen in the storage area, samples can be stored safely in the -190°C range without the risk of cross-contamination through liquid nitrogen. The Isothermal design also provides added user safety with no splashing or contact of liquid nitrogen when removing racks and samples from the freezer.

Automatic operation

CBS Isothermal Freezers feature the Series 2300 auto-fill and monitor system, which controls the automatic filling of the liquid nitrogen jacket and provides the user with an easy to read overview of the freezer temperature and status.

Sample security

A comprehensive alarm system with remote alarm contact constantly monitors all aspects of the freezer's operation. Samples are also protected by lid and control panel locks. The freezer can be monitored by a central BMS or monitoring system.

Sample storage

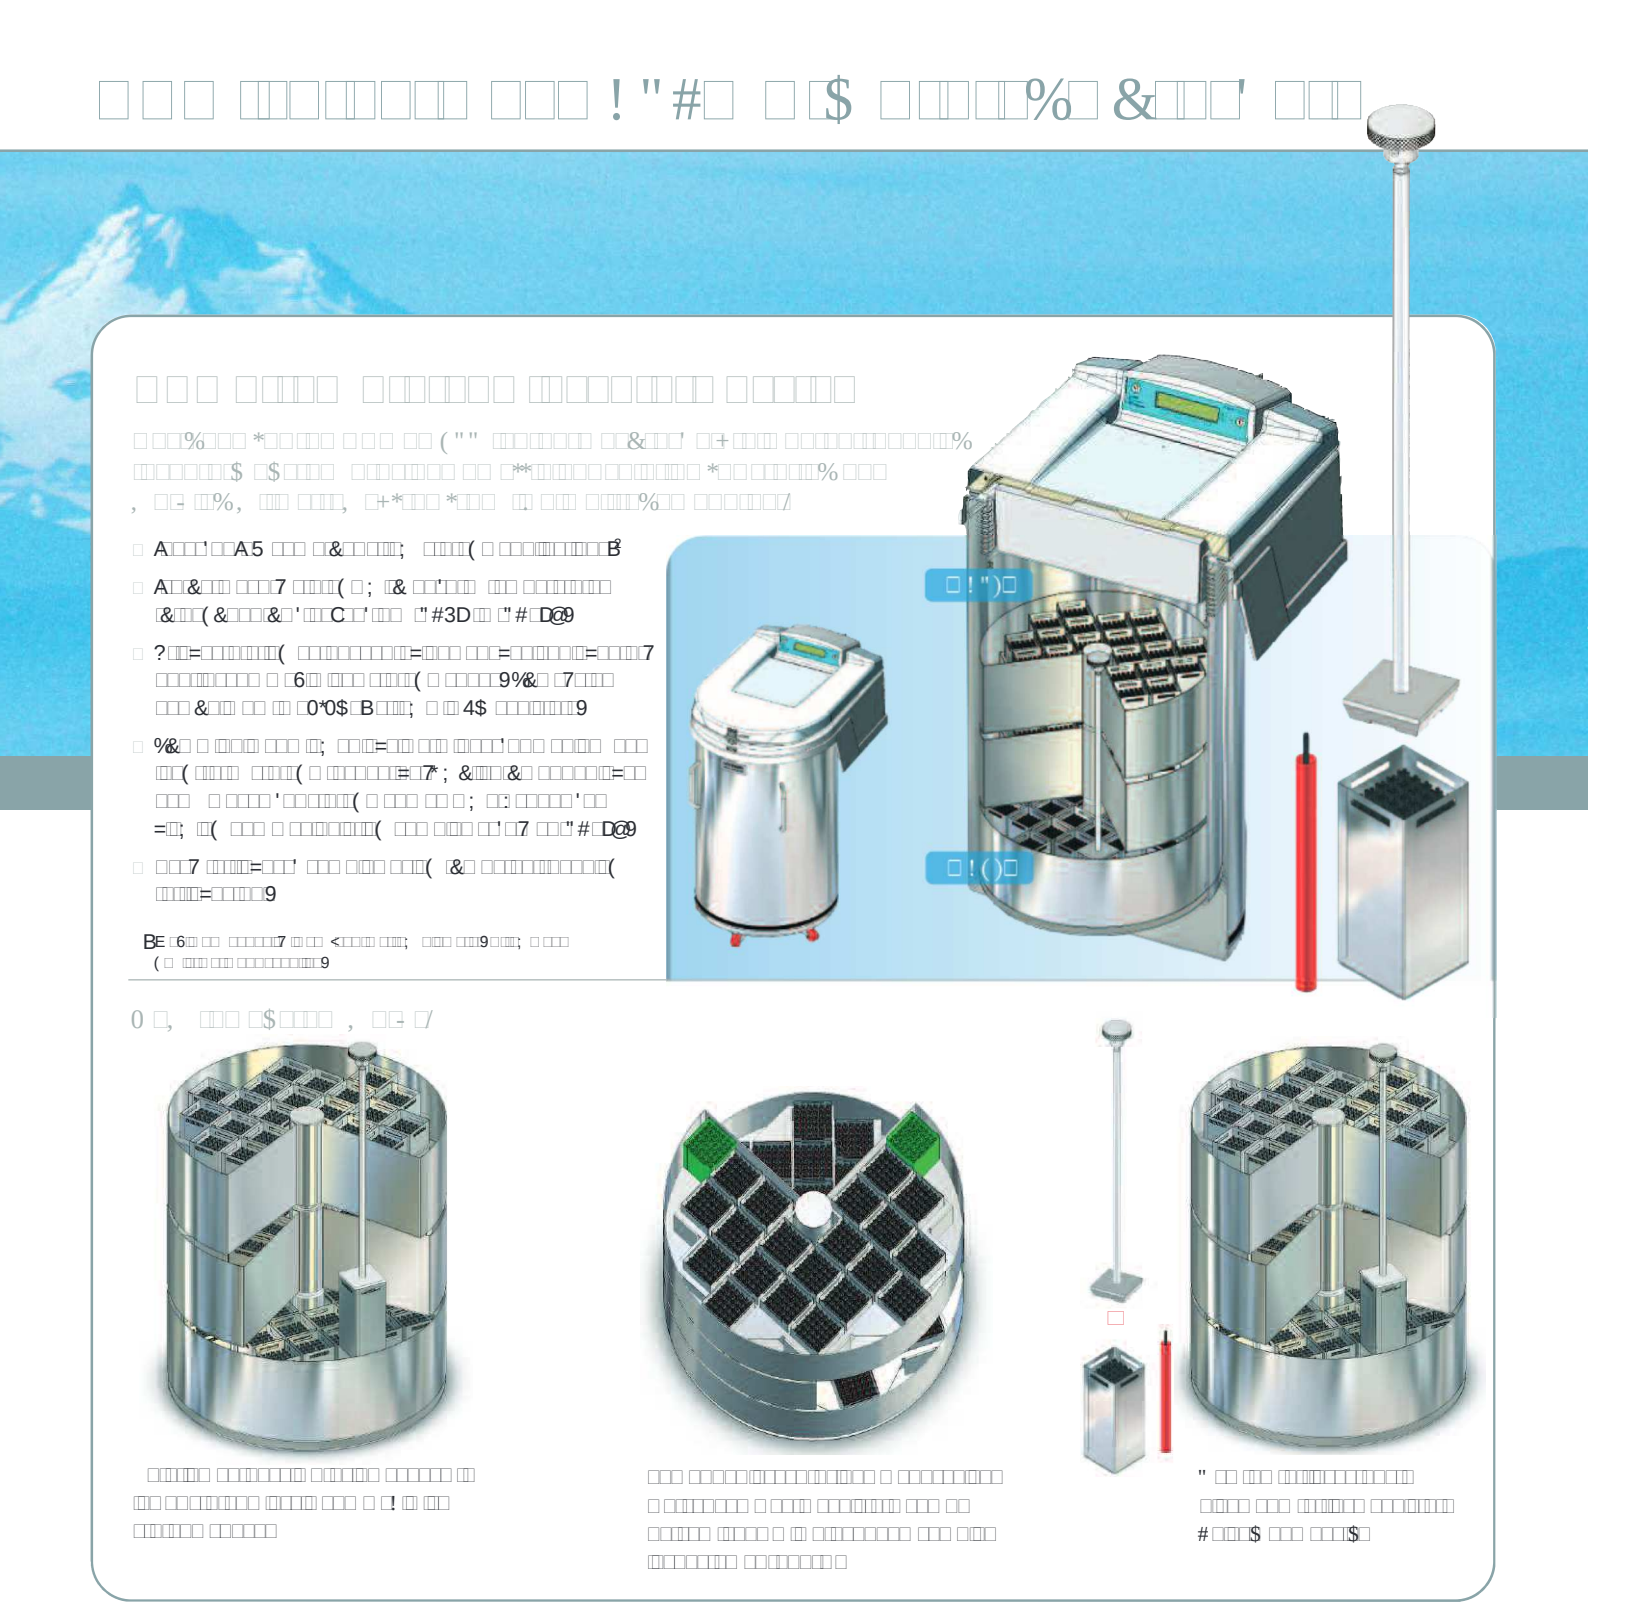

A wide selection of inventory systems for vials and bags are available to complete the system and optimize sample storage. A new, revolutionary storage and retrieval system for straws is also now available (see back page).
