TRIPLE Ease™ E+Plus™ VME Enclosure

E+Plus 1600 and 2600 series

- VME
- Ruggedized
- Fully integrated robust aluminum card guides

Triple E has a special team dedicated to subsystem design, which typically includes such components as a backplane, a power supply and cooling devices, all completely assembled and fully tested. Triple E is the vendor of choice for companies requiring reliable, rugged systems configured to specification and delivered on time.

All of Triple E's enclosure's are constructed using our patented aluminum (MaxAir™) guide deck assemblies. Accommodates 6U x 1,6mm x 160mm size boards. Designed with front to back cooling optimizing airflow.

Triple E's enclosures are built with all aluminum construction with a durable powder coat finish. Power Supply voltage LED's located on front of unit for easy monitoring. Additionally, various options are available for peripheral mounting.

Backplane specifications:

Conforms to VME64 specification (ANSI/VITA1-1994)
8-layer stripline construction, 2oz. Copper power & ground
PCB UL recognized 94V-0, Material FR-4 or equivalent
OnBoard, inboard termination
Outer ground layers for mechanical protection and EMI/RFI shielding
BusGrant / IACK daisy chain connectors used.

Power Supply specifications:

Nominal input: 115 – 240 VAC
Operational input: 90-264 VAC
Outputs: +5VDC, +/-12VDC

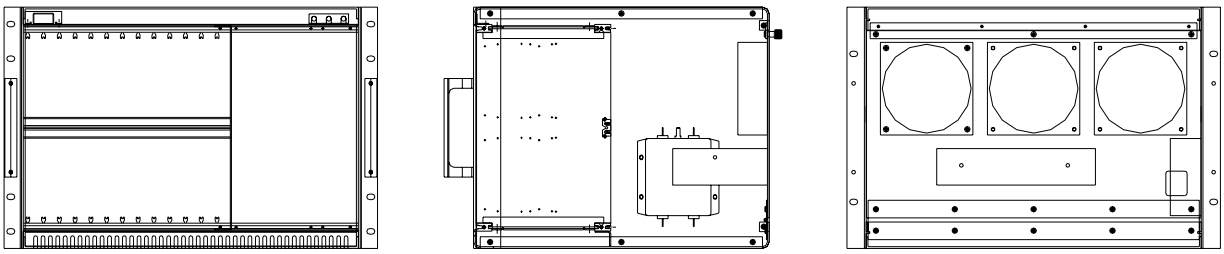

EMC: Meets EN55022 level A / FCC class A conducted
Safety: UL1950, CSA C22.2 No. 950, EN60950
