Flexible Image Acquisition Modules for MVS-8000 Vision Systems

To support a wide range of camera types used in today's industrial machine vision applications, Cognex offers a complete line of Cognex Video Modules™ (CVMs) for use with MVS-82400™ and MVS-8110™ vision systems.

Cognex Video Modules are compact daughter cards that offer support for a variety of camera types.

Cognex Video Modules are compact daughter cards containing circuitry that provides support for a wide range of analog and digital camera types, including RS-170 and CCIR analog cameras, digital linescan, large format/digital area scan cameras, and Cognex's CVC-1000™ progressive scan camera. This flexible, modular approach to image acquisition enables you to meet your current acquisition needs, while giving you the freedom to add support for other cameras as your needs change in the future.

To identify which Cognex Video Module best matches the image acquisition requirements of your application, please refer to the selection chart on the opposite side of this data sheet or consult your local Cognex Sales Engineer.

Cognex Video Modules support a wide range of camera types, including:

- Standard RS-170 and CCIR analog cameras
- Digital linescan cameras
- Large format/digital area scan cameras
- Cognex's CVC-1000 progressive scan camera
