Details | Specs | Resources

Thermopile sensor for measuring pulsed & CW lasers between 300 mW and 150W. Direct USB interface.

Key Features:

- 300 mW to 150W range
- 50 mm diameter active area
- Spectrally flat broadband coating
- 0.19 to 11 µm spectral range
- Convective air-cooled
- Direct USB interface
- ISO 17025 accredited

This PowerMax-USB PM150 sensor is a convectively-cooled laser power sensor intended for measuring lasers up to 150W.

The sensor is terminated in a USB cable that interfaces directly to a PC. A DB25 model (PN 1098398) is available.
