Ruggedized Machine Vision Lens Series

The MPW2-R Machine Vision Lens Series' Ruggedized Mechanical Design Minimizes Image Aberrations from Shock and Vibration

As machine vision applications continue to expand into more demanding environments, maintaining optical integrity with vibrations, shocks, and temperature changes is critical. Computar has designed the **MPW2-R Ruggedized Lens Series,** a ruggedized version of its popular 5 MP, 2/3" MPW2 Series of machine vision lenses.

Computar's **MPW2-R Ruggedized** Machine Vision Lens Series feature:

- Minimizes Image Aberrations from Shock & Vibration
- Same optics as existing Computar's MPW2 series
- 8mm, 12mm, 16mm, 25mm, 35mm and 50mm options
- Redundant Focus: Adjustable with double nut mechanism
- All elements are bonded to the lens body.
- Durability: 10G
- More compact than Computar's MPW2 Series
