

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

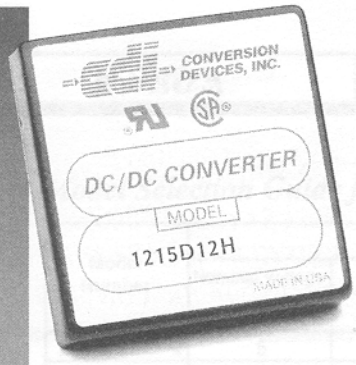

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

- Low Profile, 2 x 2 x 0.375 inch Package
- Wide -30°C to +75°C Temperature Range
- ± 0.03% Max. Line/Load Regulation
- Low Output Noise & Ripple, <10 mV Pk-Pk
- UL 1950 Approved, File No. E140645
- CSA 22.2 Approved, File No. LR89494
- >1,000,000 Hours MTBF

600H, 900H, 1200H Series

General Description

The **600H, 900H** and **1200H** series are a family of compact, high efficiency 6W, 9W and 12W DC/DC converters. All models have been approved to the latest revisions of UL 1950 and CSA 22.2 safety standards. High performance features include 500 VDC input/output isolation, efficiency as high as 75% and a maximum line/load regulation of only ±0.03%. Fifty four models provide single and dual outputs of 5, 12, 15, ±5, ±12 or ±15 VDC from input voltage busses of 5, 12, 18, 24, 28 or 48 VDC. Standard features include continuous short circuit protection with automatic recovery, an internal π filter to reduce reflected ripple current and maximum output ripple and noise of only 10 mV peak-to-peak.

Long field life is insured by the extensive reliability screening performed at **CDI**. As part of normal production processing, each unit is subjected to 72 hours of burn-in that includes power cycling and load switching. The MTBF, per MIL-HDBK-217F, is greater than 1,000,000 hours.

All **600H, 900H,** and **1200H** models are packaged in compact, low profile 2 x 2 x 0.375 inch metal cases. Continuous six-sided shielding virtually eliminates radiated emissions. This miniature size yields a power density as high as 8W/in³. Operation is specified over the wide operating temperature range of -30°C to +75°C with no derating required. Cooling is by free air convection.

Electrical Specifications

Input Specifications:

Input Voltage Range	See Table 1
Input Filter	π(Pi) Network
Reverse Polarity Input Current.	5A
Reflected Ripple Current	See Model Selection Guide

Output Specifications:

Output Voltage and Current [1]	See Model Selection Guide
Output Voltage Accuracy	±1%, Max.
Voltage Balance (Dual Outputs) [2]	±50 mV Max.
Ripple & Noise (20 MHz BW)	10 mV Pk-Pk
Line Regulation	±0.03% Max.
Load Regulation	±0.03% Max.
Temperature Coefficient @ FL	±0.01%/°C Max.
Temperature Coefficient Balance	±0.005%/°C Max.
Voltage Stability Over 24 Hours	±0.02%/kHrs.
Warm-up Drift @ FL	±1.0% Max (Inc. TC)
Transient Response	20 µSec. Max.
Short Circuit Current Limit	Iout + 75%
Short Circuit Protection; Single Output Models	Continuous
Dual Output Models	Pout +75%
Short Circuit Restart	Automatic

General Specifications:

Efficiency	See Model Selection Guide
Isolation Voltage (1 min)	500 VDC, Min.
Isolation Resistance	10 ⁹Ω
Isolation Capacitance	100 pF
CM Current Noise (20 MHz BW)	<1 mA Pk-Pk
Switching Frequency	125 kHz

Environmental Specifications:

Operating Temperature Range (Ambient)	-30°C to +75°C
Storage Temperature Range	-40°C to +125°C
Derating	None Required
Humidity	Up to 95% RH, Non-condensing
Cooling [3]	Free-air Convection
EMI/RFI	Six-Sided Continuous Metal Case

Physical Characteristics:

Size	2.0 x 2.0 x 0.375 inches (51 x 51 x 9.52 mm)
Weight	2.6 Oz (74g)
Case Material	Metal, Black Anodized
Shielding Connection	To Output Common

Reliability Specifications:

MTBF; Ground Benign, @ +25°C Ambient	1,053,086 Hours

Specifications typical @+25°C with nominal input voltage and under full output load conditions, unless otherwise noted. Specifications subject to change without notice.

Specification Notes

1. Total output power should not exceed the specified output ratings for any particular model.
2. Dual output units may be operated with unbalanced loads. Please contact the factory for information on the maximum power limits for individual outputs on specific models (again care must be taken not to exceed the overall power rating of a module.) Operating outputs in an unbalanced state may affect some specifications such as output accuracy. For more information on applying a specific model, please contact the factory.
3. Free-air convection cooling requires that the application be properly ventilated. Using a converter in a sealed application, or one in which air movement is severely restricted, could cause thermal runaway.

* For information on the standard conditions and methods used or approved by **CDI** to test DC/DC converter parameters, see the application note "Testing DC/DC converters" on page 92.

Table 1 - Input Voltage Range vs Output Load

Nominal Input (VDC)	Input Voltage Range (VDC) at:			
	20% Load	40% Load	60% Load	100% Load
5	4.30 - 6.00	4.40 - 5.70	4.55 - 5.60	4.65 - 5.25
12	10.3 - 15.0	10.4 - 14.6	10.6 - 13.6	10.9 - 13.2
18	15.5 - 22.5	15.7 - 21.6	15.8 - 20.4	16.4 - 19.8
24	20.4 - 30.0	20.6 - 29.0	21.0 - 27.0	21.6 - 26.4
28	24.2 - 36.0	24.5 - 34.0	24.9 - 31.8	25.2 - 30.8
48	41.3 - 60.0	42.0 - 58.0	42.3 - 54.4	43.2 - 52.8

Typical Applications:

- Telecommunications Equipment
- Data Processing Systems
- Mobile/Battery Powered Equipment
- Data Communications Equipment
- Distributed Power Networks
