

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

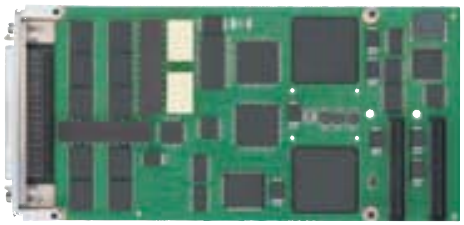

Expert team | Trust guarantee | 100% satisfaction

PVIC 8425

PCI-to-PCI Vertical Interconnection PMC Interface

PVIC 8425

Highlights

The PMC member of the PVIC family, the PVIC 8425, can be used with CES VME or CompactPCI-based processor boards for in-chassis processor interconnection (from 1 meter to 30 meters) or long distance inter-chassis connection. It takes advantage of the RIO4, RIO3, RIOC and RIOS technology, which allows simultaneous VME or CompactPCI acquisition, CPU operation and PCI input / output. It supports dedicated GTL or differential onboard physical interfaces.

It features an embedded physical interface, which can be either GTL 8425BA or differential 8425DA, therefore it does not require any PIBs.

PVIC 7225

PCI-to-PCI Vertical Interconnection PCI / PCI-X Compatible Host Computer Interface

PVIC 7225

Highlights

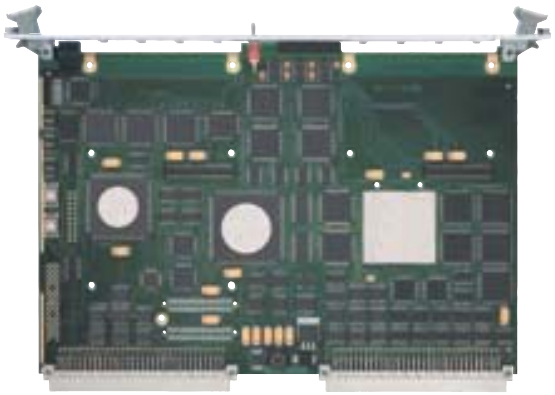

The PVIC 7225 is a PCI ISA form factor board for use in PCI or PCI-X equipped workstations (Alpha, Macintosh, PC, Silicon Graphics, Sun, etc.). It supports differential, GTL and optical physical interfaces. Drivers are available under the principal operating systems of these workstations.

The combination is available to deliver continuous data transfers at over 50 MBytes/s to 100 MBytes/s into the host without any impact on the host computing capacity.

Two versions are available, one for PC's equipped with PCI and one for the PCs equipped with PCI-X in PCI emulation.

PVIC 8025

PCI-to-PCI Vertical Interconnection VME Interface

PVIC 8025

Highlights

The PVIC 8025 is the VME interface of the PVIC family. It features the following:

- VME slot-1 and arbiter functions
- VME master / slave D64 interface
- Autonomous VME link list DMA block mover
- Remote or local trigger logic
- Completely transparent VME-to-remote PCI data transporter
- Supports both single shot and DMA transfers between PVIC and VME
