

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Crestron Cresnet II CNRACK Modular Control System

The Cresnet II is a configurable, modular control system in a card cage configuration.

Applications:

The ability to control a vast array of technologies puts the Cresnet II system into the following applications and facilities:

- boardrooms
- conference rooms
- teleconferencing
- training rooms
- home entertainment and automation
- interior and exterior lighting control
- environmental control
- educational media resource systems

Benefits:

The Cresnet II is a modular and very cost effective media control system designed to meet all your control needs. Crestron has combined innovative hardware with advanced software in a control system that is easy to specify and simple to program. The modular design of the Cresnet II enables this system to match the requirements of your unique control application. Simply plug in the control modules needed.

Control modules use the exclusive Crestron concept of high function density to achieve cost and performance advantages. For example, some modules are available with eight serial ports, sixteen solid state switch inputs, and sixteen relays. In addition, a full range of plug-in control modules are available for interfacing to any type of equipment or control scenario.

By utilizing a modular card cage configuration the Cresnet II provides expansion capabilities and incredible design flexibility. The combination of a modular system and the Crestron Windows¨/Symbol Unified Software allows changes and

modifications to be easily implemented. The Cresnet II modular control system has the extensive capabilities which continue to lead the industry.

Features:

- high function density, modular plug-in card construction for easy system design, specification and installation
- Cresnet II high-speed, long distance RS-485 local area network interconnects a wide variety of network control units
- expansion rack for economical hardware expansion
- optional local control panels provide control room indication and operation
- optional 3.5" disk drive for fast program changes or storage of sequential programs when a PC is not available
- Windows®-based programming software; with reusable drag and drop control logic that obsoletes other tedious text based systems
- dial-up communications and remote diagnostic capabilities virtually eliminate onsite service
- centralized software includes IR and device drivers; eliminates PROM changes, dip switch or jumper settings

Other Cresnet II Modular Models:

- CNRACK-D; CNRACK with 3.5 inch disk drive; holds 9 modules; equipped with Master Computer and Network port.
- CNIORACK; Expansion rack for use with CNRACK or CNRACK-D. Supports CNRY, CNIN and CNOUT modules; holds 10 modules; up to 13 CNIORACKs may be used with a CNRACK or CNRACK-D; includes Expansion Computer and Network port.
- CNLCP-32; 32 function local control panel; installs on front of CNRACK, CNRACK-D or CNIORACK; includes colored caps, feedback LEDs and custom engraving.
- CNLBG-2; 2 channel bargraph panel and volume control panel; install on front of CNRACK and CNRACK-D; requires (1) CNLCP-32.
