

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

PMC-702 Graphics Input Output PMC

The PMC-702 Graphics Controller is an industry-standard PCI Mezzanine Card (PMC) that is fully compliant with the requirements of standard IEEE 1386.1. It provides high performance synthetic graphical output capabilities for applications requiring a visual Human Machine Interface. It also provides analog and digital video capture, extensive analog and digital output capabilities, and video synchronization capabilities.

The PMC-702 embodies the COTS philosophy in the silicon technology it uses and in the software standards it implements. An industry-standard, high performance X11/OpenGL programming interface is provided to run on an advanced OpenGL-oriented 3D graphics acceleration chip.

PMC-702 is targeted at applications requiring the high-speed presentation of synthetic graphics generated programmatically on a Single Board Computer (SBC) where these must be fused with such sensor data as live video, where a variety of video output formats are needed, or where it is desired to synchronize the output of the card with other video sources.

- Permedia®3 graphics accelerator featuring hardware anti-aliasing and OpenGL® acceleration
- 32 Mbytes of graphics memory
- RGBHV non-interlaced analog outputs RGBHV interlaced analog output Sync on green
- FlatLink (5 LVDS pairs) digital video capture (OpenLDI compatible)
- DVI digital video output
- 4 NTSC/PAL (including RS-170) video capture inputs
- External sync input
- Dy 4 Systems X11™/OpenGL
- Diagnostic software support
- PCI Rev 2.1 compliant, 32bit 33/66 MHz capable
- Available in the full range of ruggedization levels, both air-cooled and conduction-cooled

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.

Learn more!

Visit us at **artisantg.com** for more info on price quotes, drivers, technical specifications, manuals, and documentation.

Artisan Scientific Corporation dba Artisan Technology Group is not an affiliate, representative, or authorized distributor for any manufacturer listed herein.

We're here to make your life easier. How can we help you today?
