PMC 65 *Dual Gigabit Ethernet*

- Dual 10/100/1000 BaseT Ethernet Ports
- Host Offered Features
- 133 MHz, 64-bit PCI-X bus

The PMC Module provides I/O expansion and flexibility by allowing customers to add a wide range of I/O interfaces to Cyclone's CompactPCI products. Cyclone's CompactPCI cards support one or two modules on a board. Designers can mix and match standard and custom modules to meet unique I/O requirements.

The PMC Module is an IEEE standard (IEEE 1386). The standard uses the PCI bus as an electrical standard, providing 32-and 64-bit transfers at 33 MHz clock speeds. Cyclone has augmented the standard to support more than one agent on a PMC Module. The PMC locations are still compatible with the IEEE standard.

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com

Artisan Technology Group is an independent supplier of quality pre-owned equipment
