ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Micrometer Positioning Stages

Del-Tron offers a wide range of linear positioners. These micrometer positioning stages and crossed roller positioning stages are available with travels ranging from .25” to 2.0”. All of are linear positioners are available in X, XY and XYZ configurations and can carry loads ranging from 4 lbs on our miniature ball slide series all the way up to 160 lbs on our crossed roller positioning stages. All model numbers are available with inch or metric micrometers and mounting holes. Most models are available with locking micrometers and all models can be supplied with our Posi-Lock friction locking mechanism to secure the table. We also offer the SD Series (side drive mounted micrometers) designed for applications requiring the smallest footprint possible. Positioning accuracies range from 0.0005” per inch of travel straight line accuracy on our ball slide positioning stages to 0.0001” per inch of travel straight line accuracy on our crossed roller positioning stages. For your convenience solid model drawings for all of our postioning stages are available on our website and we are always ready to discuss any special needs or modifications you may require. Additional industry terms include positioning stages, linear positioners, XY stages, micrometer slides, roller tables, linear translation stages, and more generally as linear slides, linear actuators or motion slides.

- **Versatile - Smooth, accurate travel for intermittent motion applications**
- **Positive Locking - Side mounted lock feature prevents movement of carriage**
- **Accurate Measurements - Carriages are spring loaded against micrometer heads with 0.001" (0.01mm) graduations**
- **Adaptable - One, two or three axis models can be used in any orientation**
- **Easy To Use - Standard counterbored holes in base and threaded holes in carriage**
- **Wide Selection – Subminiature, low profile models and side drive micrometer mounts**
