ACC-26A

Serial Communication Optical-Isolation/Adapter Board

Part Number: 602213

Features & Options

PMAC's Accessory 26A is a serial communication optical isolation board for all versions of PMAC. The ACC-26A Option-1 can be used for optical isolation of the host computer's RS-232 to PMAC's RS-422 connector J4 (this is suitable for the PMAC-PC, PMAC-VME, and PMAC-LITE). ACC-26A Option 2 is suitable for the Mini-PMAC. Option 2 simply acts as an optical isolation board between the host's RS-232 and the PMAC's RS-232 connectors. ACC-26A Option 3 provides, through its J5 (JGEF) connector, optical isolation of the serial communication link between a host computer and the GE-FANUC series 90-70 PLC. ACC-26A Option 4 may be used for Delta Tau's other motion control cards (SMCC and MCC). The board comes with a standard DIN-rail mounting system, or you can use the four corner holes to mount the board with standoffs. Both DB-9 and DB-25 connectors are provided for host connection.

Options:

- Option-1: Host RS-232 to PMAC RS-422, w/26-pin 60-cm (24") cable
- Option-2: RS232 to RS232 optical isolation w/10 pin 24" cable
- Option-3: RS232 to RS422, (GE Fanuc Series 90-70 PLC)
