Ordering Information

Ordering Instructions

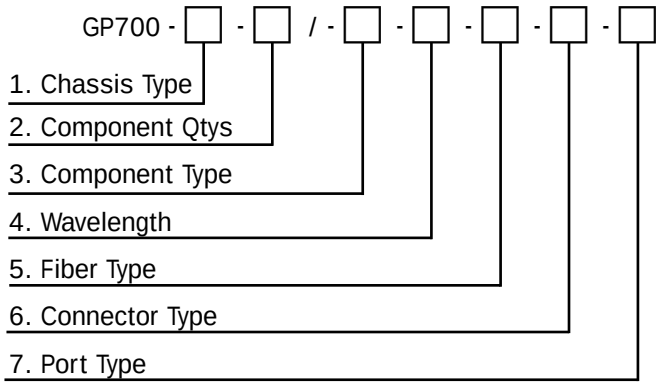

GP700 configurations range from very simple to extremely complex.

The following GP700 ordering information summarizes the standard GP700 component-module and configuration options. To request a quote, choose a preferred chassis size, and list the components you would like installed in your GP700 by using the standard part number structure.

If you have any special requirements, or would like to add additional passive components such as splitters and couplers that are not electrically controlled, please describe or draw your requirements on a separate sheet. A custom P/N will be assigned by DiCon based on your request.

Fax your drawings to (510)620-4102, attn: Measurement Sales.
