Ultra Fast SBC Designed for Harsh Environments

DY 4 Systems Inc. announces the introduction of a COTS VME single board computer (SBC) based on the Intel® Pentium® III embedded mobile module. The Pentium III module, available at 500 MHz, offers low-power consumption, a low-profile, high-reliability and extended component life. Designed and optimized for harsh environments, the SVME/DMV-193 SBC is said to provide one of the highest performances in embedded desktop computing environments available in embedded packaging. And because the SVME/DMV-193 SBC is designed to withstand extended temperature, shock and extreme vibration, it is ideal for airborne, land-mobile and naval command and control applications. The SBC allows integrators to reduce software maintenance costs and realize substantial productivity gains by taking advantage of COTS software, including WindowsNT, Windows 2000® and other PC/AT™ compatible applications. In addition, the SVME/DMV-193 provides 512 Kbytes of level 2 cache memory, up to 256 Mbytes of SDRAM and 2 Mbytes of Flash EPROM. Pricing starts at $8,750. **DY 4 Systems, Inc., 333 Palladium Dr., M/S 212, Kanata, Ontario K2V 1A6, Canada; (613) 599-9199; Fax: (613) 599-7777; sales@dy4.com; www.dy4.com.**

Artisan Technology Group - Quality Instrumentation ... Guaranteed | (888) 88-SOURCE | www.artisantg.com
