Misc Processors and Memory

3821 4K, 24-bit RAM Memory

The Model 3821 is a single-width CAMAC module containing a 4K (4096 x 24) RAM memory. The memory can be written or read from the Dataway. Four address registers can be accessed from the Dataway, providing independent communication with this module by the main crate controller and one or more auxiliary controllers. *Data sheet available upon request.*

3841 256-word FIFO Buffer

The Model 3841 is a single-width CAMAC module containing a first-in-first-out (FIFO) memory organized as 256 24-bit words. The memory can be read from the Dataway or from the front-panel output connector. Similarly, it can be written from the Dataway or from the front-panel input connector. *The Model 3842 FIFO Buffer Memory is recommended for new designs.*

Artisan Technology Group is an independent supplier of quality pre-owned equipment
