Auger valve controller

1/2 actual size

Description

The **VALVEMATE™ 7090** controller provides precise time, fluid pressure and speed control for the **790 Series auger valves**.

Microprocessor-controlled functions include motor start-up acceleration limits and maximum current overload protection for extended motor life.

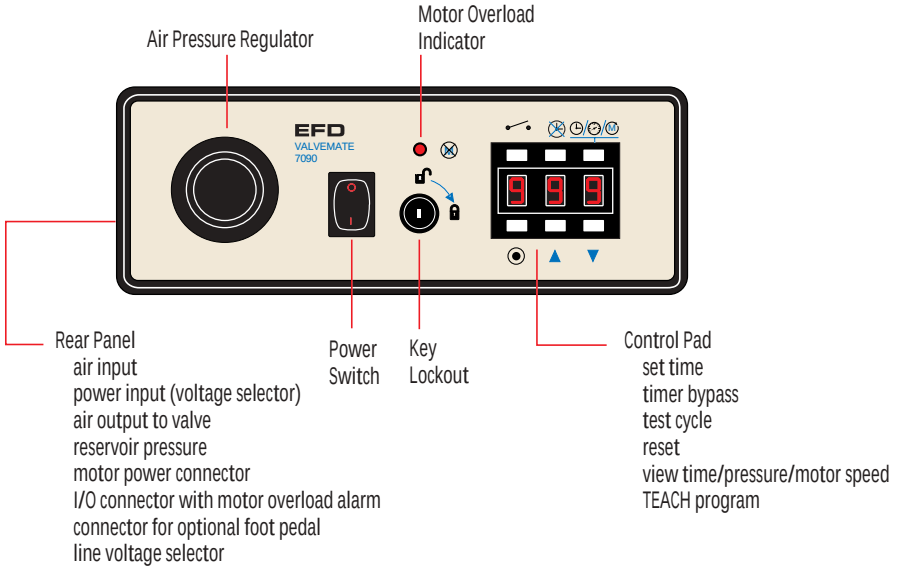

Precision air pressure regulator provides precise pressure to the barrel reservoir and can be operated in a continuous or pulse mode.

Each 790 Series valve requires one VALVEMATE™ 7090 for proper operation.

Benefits

"On-the-fly" adjustability
Motor voltage range of 10-24 VDC
Nonvolatile, power-off memory
Panel or bracket mounting
Digital time, pressure, voltage display
Motor overload/fault detection
Key lockout
Programmable time

For complete details see controller specifications.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
