2000 series automatic wafer probers

Fast, Efficient and Reliable Performance

Electroglas 2000 Series Automatic Wafer Probers, for 75 mm to 150 mm diameter wafers, combine high performance and reliability in a cost-effective package. Featuring advanced automation and a modular design, the 2000 Series probers are compatible with all major ATE systems. Product highlights include:

- Unique linear motor technology for maximum reliability and performance.
- Modular design, single or multi-cassette capability.
- Easy to use, optional advanced user interface with full color, real-time wafer mapping.
- Optional networking connectivity to facilitate data collection, monitoring and analysis for improved productivity.
- Base unit model for low volume and cost-sensitive applications.
