IPCA 200

Carrier Board for IPIN Modules

logo

Picture

Produkt-Bild
IPCA 200

The IPCA 200 is an IPIN carrier board for three IPIN modules. It contains 128KB static RAM as on-board buffer to enhance the performance of specific applications.

In most cases the IPCA 200 with one or more IPINs installed still occupies one VME slot only.

Features

- VMEbus and VSBbus interface to ELTEC`s Local Extension Bus
- Support for VME standard and extended address mode decoding
- On board 128KB SRAM which is multiported between the IPIN, the VMEbus and the VSBbus
- Accommodates up to three master/slave IPIN modules for 16 and 32 bit data transfer
- Each IPIN can generate an interrupt request on the VMEbus. The interrupt priority for every LEB can be switched in 6 steps.
- The base address of the board in the VMEbus and VSBbus address space is selectable by hexcode switches
- Support of address modifier decoding
