

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

MVME2500 Series

VME64 Processor Board

Embedded Computing for Business-Critical Continuity™

QorIQ processor based board provides high performance at a low power envelope

- 800 MHz or 1.2G Hz Freescale QorIQ™ P2010 and P2020 processors
- 1GB or 2GB DDR3-800, soldered down
- Three on-board Gigabit Ethernet interfaces (one front, one rear, one configurable by customer to front or rear)
- Five serial ports
- One USB 2.0 port
- One PMC/XMC site
- Optional rear transition module
- Hard drive mounting kit available
- Extended temperature (-40 °C to +71 °C) and rugged variants

The Emerson Network Power MVME2500 single-board computer (SBC) features the latest Freescale QorIQ™ processors -- the single-core P2010 and dual-core P2020. The e500 v2 core QorIQ processor uses 45 nanometer technology which delivers an industry-leading performance-to-power ratio with single-core or dual-core frequencies up to 1.2 GHz at less than 8W. This is a perfect migration path for our PowerQUICC processor boards (MVME3100 and MVME4100), as well as our G4 processor boards (MVME5100 and MVME5110).

On-board memory includes up to 2GB DDR3 memory and 512KB non-volatile magneto resistive random access memory. MRAM is high speed non-volatile RAM with unlimited read/write access that protects data in the event of a power loss and does not require periodic refresh. MRAM is ideal for critical non-volatile data storage, data logs, dynamic program updates, and dynamic security. Connectivity includes three Gigabit Ethernet ports, one USB 2.0 port, five serial ports, one internal SATA port and one XMC site. A hard drive mounting kit is available for Serial ATA rotating or solid-state hard drives.

The extended temperature models feature an operating temperature range of -40 °C to +71 °C – a significant increase over the standard models' 0 °C to +55 °C range. Acceptable storage temperatures have also been increased, safely accommodating environments from -50 °C to +100 °C. Both models are capable of operating under up to 5G of vibration (15 to 2000 Hz) and can withstand an 11 millisecond shock of up to 30G. Conformal coating is also available.

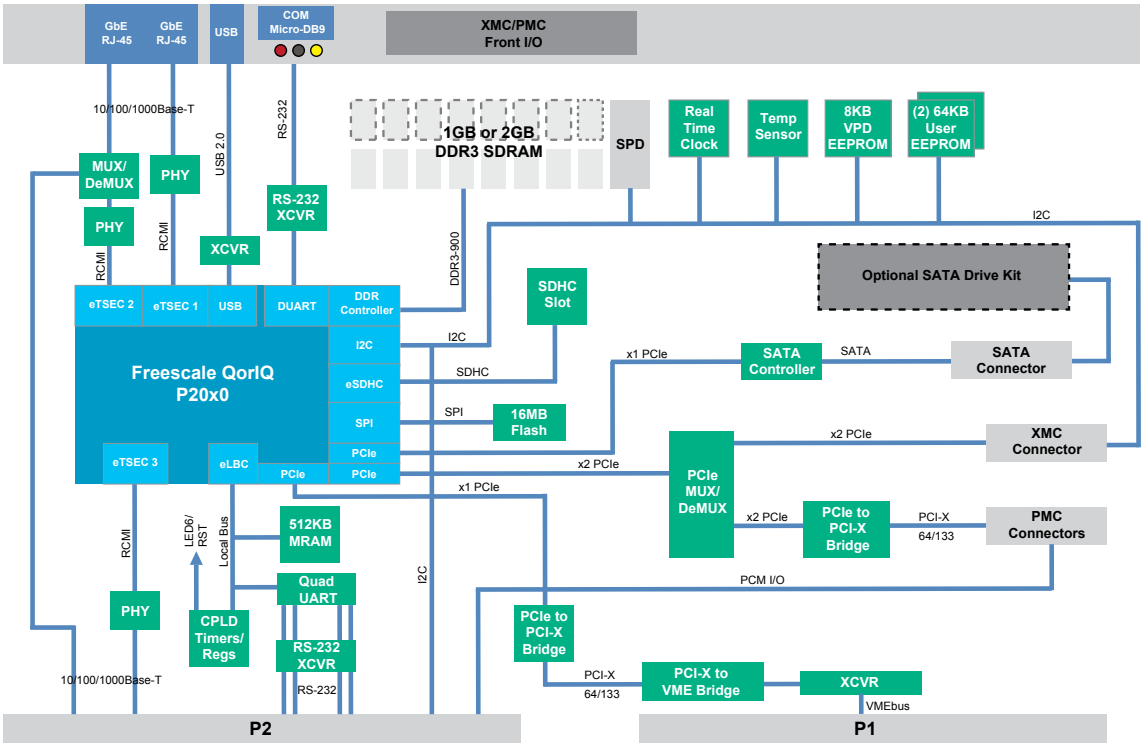

The MVME2500 is ideal for automation, medical, and military applications such as railway control, semiconductor processing, test and measurement, image processing, and radar/sonar.

RoHS 6/6 COMPLIANT

EMERSON™
Network Power

MVME2500 Block Diagram

Transition Modules

The MVME7216E transition module provides industry-standard connector access to two 10/100/1000Ba-seTX ports, and four asynchronous serial ports configured as RS-232 DTE. All of these are via RJ-45 connectors. The MVME7216E RTM is designed to directly connect to the VME backplane in chassis' with an 80mm deep rear-transition area. This transition module is compatible with the MVME3100, MVME4100, MVME7100 and iVME7210 boards.

Software Support

FIRMWARE MONITOR

The MVME2500 uses U-Boot firmware which is resident in the MVME2500 flash and provides power-on self-test, initialization and operating system booting capabilities. It is based on the 2009.08 patched U-Boot provided by Freescale.

OPERATING SYSTEMS AND KERNELS

The MVME2500 series supports booting a variety of operating systems including a range of real-time operating systems and kernels. Emerson Network Power Embedded Computing Linux (2.6.27 kernel) and QNX Software Development Platform (SDP Version 6.4.1) are supported by Emerson. VxWorks BSPs (6.8 SMP) are provided and supported by Wind River Systems. Also in development are Linux kernels from Greenhills and LynuxWorks.

Specifications

HARDWARE PROCESSOR/CHIPSET

- 800 MHz Freescale P2010 single-core processor
- 1.2 GHz Freescale P2020 dual-core processor
- 512KB L2 shared cache
- Integrated, on-chip controllers for DDR2/3, PCI Express, USB 2.0, DUART, 10/100/1000 Ethernet, DMA, SDHC, SPI flash, I2C and security acceleration
- Eight 32-bit timers

MEMORY

- Single channel 800MB/s
- 1GB or 2B DDR3-800, soldered down

USER FLASH/NVRAM MEMORY

- 512KB MRAM (NVRAM)
- SDHC socket

BOOT FLASH MEMORY

- 16MB SPI flash (2x 8MB)
- Support for crisis recovery

VMEBUS INTERFACE

- Compliance: ANSI/VITA 1-1994 VME64 (IEEE STD 1014), ANSI/VITA 1.1-1997 VME64 Extensions, VITA 1.5-199x 2eSST
- Controller: Tundra Tsi148 PCI-X to VMEbus bridge with support for VME64 and 2eSST protocols

I/O CAPABILITIES

- Three GbE interfaces (one front, one rear, one configurable to front or rear)
- PMC/XMC (PCI Express x2)
- Micro DB-9 (front)
- Four RS-232 serial ports (rear)
- USB 2.0 interface (front)
- SATA port for optional on-board hard drive

MVME721 TRANSITION MODULE I/O

- Two GbE interfaces
- Four RS-232 serial ports
- I^2C
- PMC I/O

OTHER FEATURES

- Watchdog unit
- Three independent 32-bit tick timers
- Status and user LEDs
- Reset switch
- Locking ejector handles
- Temperature sensors

SOFTWARE

- U-Boot Firmware

POWER REQUIREMENTS

- Maximum for 800 MHz, 1GB memory variant
  - 5.0V 5A 25W (Estimated)
- Maximum for 1.2 GHz, 2GB memory variant
  - 5.0V 5.7A 28W (Estimated)

MTBF

Calculated per Telcordia SR-332, Issue 2 and based on a ground fixed, controlled environment assuming an inlet air temperature of 40 °C. 100,000 hours

ENVIRONMENTAL

Ruggedization Level	ENP1	ENP2
Cooling Method	Forced Air	Forced Air
Operating Temperature	0 °C to +55 °C	–40 °C to +71 °C
Storage Temperature	–40 °C to +85 °C	–50 °C to +100 °C
Vibration Sine (10min/axis)	1G, 5 to 200 Hz	5G, 15 to 2000 Hz
Vibration Random (1hr/axis)	$.01g^2$/Hz, 15 to 200 Hz	$.04g^2$/Hz, 15 to 2000 Hz (8GRMS)
Shock	20g/11mS	30g/11mS
Humidity	to 95% RH	to 100% RH
Conformal Coating	No	Option (Acrylic)

ELECTROMAGNETIC COMPATIBILITY (EMC)

- Intended for use in systems meeting the following regulations:
  - U.S.: FCC Part 15, Subpart B, Class A (non-residential)
  - Canada: ICES-003, Class A (non-residential)
- Emerson board products are tested in a representative system to the following standards:
  - CE Mark per European EMC Directive 89/336/EEC with Amendments; Emissions: EN55022 Class B; Immunity: EN55024
  - KCC Mark

DOCUMENTATION
