Thermo Scientific Finnpipette® Focus Multichannel Plus Pipettors

New

Bringing accuracy, speed, and comfort to microplate pipetting!

- Super blow-out ensures accurate and complete liquid delivery at 1 to 10 µL volumes
- Color-coded volume adjustment knobs with click-lock mechanism for fast volume setting
- Improved finger rest and handle shape offer support for your hand
- Soft-touch tip ejection is more efficient and requires less effort during long periods of repetitive pipetting
- 5-year warranty with Web registration

These multichannel pipettors feature super blow-out for 1 to 10 µL volumes for precise and fast dispensing into microplates. The ergonomic design makes them more comfortable and less tiring to use over long periods of repetitive pipetting. Color-coded volume adjustment knobs make it easy to distinguish between volume ranges. Order pipette tips separately from table or pages 1368–1370.

Eppendorf® Titermate™ Multichannel Pipettors

Easily switch between 8- and 12-channel manifolds

- Volume adjustment lock helps prevent user error

Titermate pipettors feature 8- and 12-channel manifolds that are interchangeable within each volume range. Manifolds are autoclavable—ideal for sterile applications. An air interface separates the sample from the pipettor to help prevent sample contamination—only the tips contact the reagent.

Pipettors include one manifold, a reagent reservoir, and an adapter to attach to the optional stand. An O-ring on each nose cone ensures tips fit properly. All models accept polypropylene tips (sold separately on pages 1364–1371).

Digital display is easily viewed during use.
