PMC-CAN/331

Intelligent PMC-CAN-Interface

- PMC module with one or two independent CAN nets
- Microcontroller 68331 on board

PMC-CAN/331

Powerful CAN Interfaces on PMC Module

The module PMC-CAN/331 uses a 68331 microcontroller that cares for the local CAN-data management. The CAN data is stored in the local SRAM with guaranteed security and consistency of data to 1 Mbit/s.

CAN Interface

The fully ISO 11898 compliant CAN interfaces allow a data transfer rate of 1 Mbit/s. The CAN interfaces are electrically isolated with optocouplers and DC/DC converters.

Software Support

The board ships with software examples in source code for DOC and Windows 3.11. There are software drivers available for Windows, Linux, VxWorks, LynxOS, RTOS-UH and other operating systems.

CAN Protocols

esd has software packages for CAL, CANopen or DeviceNet available for Windows NT, Windows 95/98 or UNIX systems.
