Rough handling and high voltage are tough on a meter. But the new Fluke 75 takes it all in stride. They're built tough inside and out. With overvoltage protection to guard against spikes up to 6 kV, and safety ratings to prove it. They even protect against measuring voltage if the knob is accidentally set on ohms. Plus, their rugged, overmolded body armor case offers constant protection no matter how much you throw them around. As tough as they are, the Fluke 75 DMMs are very easy on you. The tapered design fits more easily in your hand, pocket, and tool box. The high-contrast displays are larger, with extra large characters that are easy to read from a distance. Plus, there's easier access to Fluke's patented TouchHold® mode which automatically captures the measurement, beeps, and locks it on the digital display for later viewing.
