ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Auto Mode Decision Diagram

Measurement Ranges and Accuracy, Normal Level

- For SMD components use PM 9542 SMD Adapter or PM 9540/TWE SMD Tweezers.
- For larger components use PM 9542A RCL Adapter.
- For in-circuit measurement of components use PM 9541A Kelvin Clips Test Cable.
- For two-wire measurements plug two normal test leads into the upper connectors.

- Center segments of digits flash when component exceeds measurement range:
  R >200 MΩ
  C >32 F at 50 Hz, >16 mF at 100 kHz
  L >637 kH at 50 Hz, >318 H at 100 kHz.
- Asterisk flashes if component is outside basic accuracy of the instrument. Select appropriate test signal frequency.
- Discharge capacitors before connecting.
- **ZERO TRIM** compensates:
  - Contact and line resistances (up to 10 Ω in short circuit).
  - Stray capacitances in open-circuit.
- Test signal frequency 50 Hz to 100 kHz.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
