Sensbox

The SensBox is a unique and multi-purpose device that brings sophisticated flight computer capability to smartphones and tablets while also serving as an IGC data logger, and back-up flight instrument. The SensBox is equipped with highly sophisticated sensors capable of measuring and recording position and complete 3-axis motion through space. Flight data is sent to a smartphone or tablet running flight software via Bluetooth while simultaneously flight recording and displaying basic flight data on the SensBox the in realtime. The SensBox can also function as advanced data acquisition recorder for design and performance testing.
