# TView Gold PCI

PC-to-TV Video Converter

**TVIEW GOLD PCI**

P/N
444-5207 (US)
444-5208 (ROW)

**TVIEW GOLD PCI IS THE PROFESSIONAL WAY TO OUTPUT VIDEO FOR PRESENTATIONS, GAMES, MULTIMEDIA, AND THE INTERNET. TVIEW GOLD PCI REQUIRES A SINGLE PCI CARD SLOT IN YOUR WINDOWS COMPUTER.**

**Another revolutionary breakthrough in presentation technology from FOCUS Enhancements! The TView Gold PCI Card integrates award-winning PC-to-TV video conversion into the most common and versatile form factor available on the personal computer, the PCI card.**

## FS400 ASIC TRUESCALE™ DIGITAL VIDEO PROCESSING

By utilizing FOCUS Enhancements' proprietary FS400 ASIC TrueScale™ digital video processor, TView Gold PCI will convert computer resolutions up to UGA (1600 x 1280) to video for display on your video monitor, television, or projector. Only TView Gold PCI gives you complete control over the video positioning, filtering, and output of your PC with an easy-to-use software control panel.

## SECURE AND PERMANENT INSTALLATION

The Plug & Play TView Gold PCI PC-to-TV video converter fits into any PC-based slot in any Windows personal computer. Simply install the board into your computer, connect to your television with one of the included cables, and you are ready for impressive, striking presentations. Our UniViewer cable provides a pass-through connection to your existing computer monitor, and TView Gold PCI provides the high quality composite, S-Video, or SCART video signal.

## PRESENTATIONS COME ALIVE

The video output from TView Gold PCI can be positioned and sized to perfectly fit the screen. Brightness, Sharpness, Zoom, and Auto Pan controls allows the image to be optimized for any television. Exclusive filters stabilize the video so your moving video, slide presentations, spreadsheet, and other computer applications will look their best. With TView Gold PCI you can accurately adjust your image to see your entire PC screen on your television without losing menu bars or corners.

## COMPARE THE IMAGE

The TrueScale™ Digital Video Processing circuitry ensures that the video image on the TV monitor will match what you see on your computer screen. Don't rely on inferior converters that are difficult to setup, or poor-quality on-board video outputs that may leave you and your audience hanging in the dark. Insist on TView Gold PCI, and give your presentation the full quality that is only available from FOCUS Enhancements.
