Centellis CT Series 16xxx

Information Sheet

P/N 210653

The Centellis CT Series 16xxx system uses leading edge technology. The following important information should be noted:

Hot Swap

The Centellis CT Series 16xxx system was originally conceived and designed in December, 1997; the current CompactPCI Hot Swap Specification PICMG 2.1 R1.0 was released in August, 1998. After reviewing the Centellis design, we have determined that the system backplane does not meet the full release specification for hot swap. In response to this situation, we are currently upgrading the design to meet the full release specification. Testing and verification of the upgraded design will be required to complete the design upgrade and produce a fully compliant hot swap system. Hot swap compliance, however, does not affect the basic functionality of the Centellis CT Series 16xxx system.

Ripple Voltage

In reviewing the Centellis CT Series 16xxx system, the system's 300W power supplies were found to be not in compliance with the ripple voltage requirements of CompactPCI Specification PICMG 2.0 R2.1, September 2, 1997. Efforts to comply with the specification are currently under investigation.

FORCE COMPUTERS, Inc.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
