FREQUENCY DEVICES™, INC.

For Fixed Frequency Filters

Single Channel Filter Mounting Box

Description

The FIB1 Filter in a Box eliminates the need to breadboard or hand-wire filter modules into individual test set-ups.
FIB1s' come factory assembled with your choice of one of our fixed frequency filters already installed. Each FIB1 has its own ±15 volts power supply and BNC connectors for the inputs and outputs. The FIB1 will work with any of the D01-EVR, D61, D64, D66, D68, D70, D72, D74, D76, D78, or D100 series filter modules.

Features/Benefits

- No more building of breadboards
- Single channel enclosed box for protecting the filter and its wiring
- Accepts a broad range of FDI filter modules allowing for selected cut off frequency and transfer function
- Provides easy connection to the filter with simple industry standard BNC connectors
- Reduced engineering design, set up, and test time
- Provisions for adjusting the DC offset of the installed filter
- Analog power supply to minimize noise

Applications

- Aerospace, navigation, sonar applications
- ATE, research and development
- Automotive and transportation
- Communication systems and electronics
- Data acquisition systems
- Industrial process control
- Medical electronics equip. and research
- Sound and vibration testing
- Noise elimination
- Signal reconstruction
