ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

RX3i 24VDC Input Module 32 point. IC694M IC694MD IC694MDL

919-535-3180
sales@pdfsupply.com

Input Module, 24 VDC 32 Point Grouped: IC694MDL660

The ***24 VDC Positive/Negative Logic Input*** module, IC694MDL660, provides 32 discrete input points. The inputs are positive or negative logic inputs and will operate at levels up to 30V.

The inputs are arranged in four isolated groups of eight; each group has its own common. Isolation is provided between the four groups of inputs, however each group of eight inputs is referenced to the same user common connection.

Module MDL660 provides seven selectable input filter times. Filter times can be set from the programmer using the module's assigned output data references.

This module can be used with either a Box-style (IC694TBB032) or Spring-style (IC694TBS032) front Terminal Block. The Terminal Block is ordered separately.

32 green LEDs indicate the ON/OFF status of points 1 through 32. The red/green TB LED is green when the module's removable terminal block is locked in place. It is red when the terminal block is not locked. The module also sends an *Addition of Terminal Block* or *Loss of Terminal Block* message to the RX3i CPU to report the terminal block status.

The blue bands on the label show that MDL660 is a low-voltage module.

This module can be installed in any I/O slot in an RX3i system. It must be used with an RX3i CPU (release 2.90 or later). It cannot be used with a Series 90-30 PLC CPU.

Module MDL660 uses 48 input bits and 16 output bits to exchange point status and filter information with the RX3i CPU.

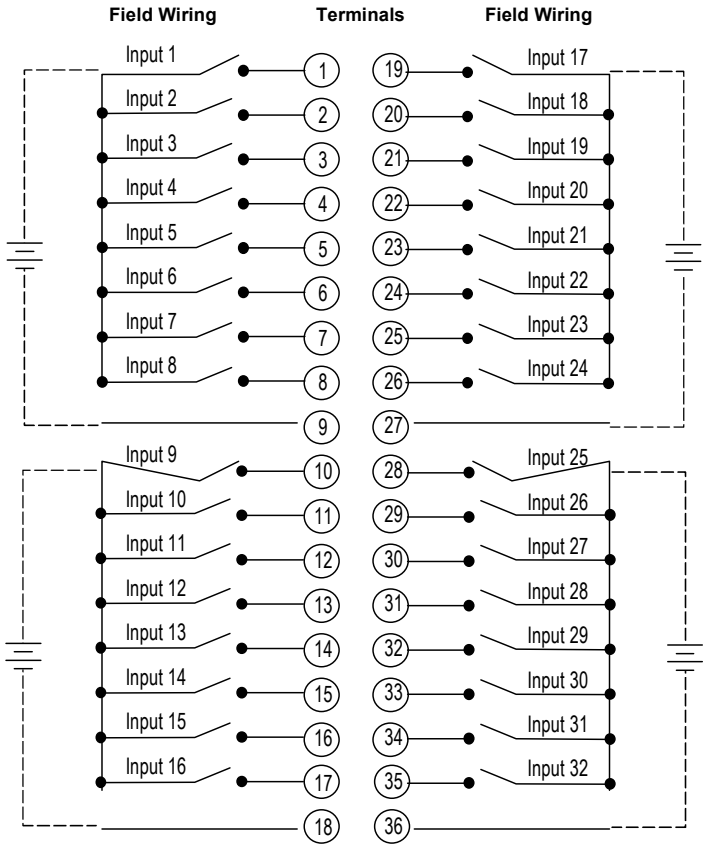

Specifications: MDL660

Rated Voltage	24 volts DC
Input Voltage Range	0 to 30 volts DC
Inputs per Module	32 (four isolated groups of 8 inputs)
Isolation:	
Field to Backplane (optical)	250 VAC continuous; 1500 VAC for one minute
Group to Group	250VAC continuous; 1500 VAC for one minute
Input Current	7.0 mA per point (typical) at rated voltage
Module ID	0x058h
Input Characteristics:	
On–state Voltage	11.5 to 30 VDC
Off–state Voltage	0 to 5 VDC
On–state Current	3.2mA minimum
Off–state Current	1.1mA maximum
Input Filter Times	0.5ms, 1.0ms, 2.0ms, 5ms, 10ms, 50ms and 100ms, selectable per module
On response time	0.5ms, 1.0ms, 2.0ms, 5.0ms, 10.0ms, 50.0ms & 100.0ms (as per filter setting)
Off response time	0.5ms, 1.0ms, 2.0ms, 5.0ms, 10.0ms, 50.0ms & 100.0ms (as per filter setting)
Power Consumption	300mA (all inputs on) from 5 volt bus on backplane
Diagnostics	Terminal block presence reported to RX3i CPU

Refer to Appendix A for product standards and general specifications.

Field Wiring: MDL660

Connections	Terminals	Terminals	Connections
Input 1	1	19	Input 17
Input 2	2	20	Input 18
Input 3	3	21	Input 19
Input 4	4	22	Input 20
Input 5	5	23	Input 21
Input 6	6	24	Input 22
Input 7	7	25	Input 23
Input 8	8	26	Input 24
Common 1 - 8	9	27	Common 17 - 24
Input 9	10	28	Input 25
Input 10	11	29	Input 26

Module Data: IC694MDL660

Discrete Input Module IC694MDL660 uses 48 input reference bits and 16 output reference bits in the CPU.

Input Data: MDL660

The module uses the first 11 input bits to report its status information to the RX3i CPU. It has the following content:

Bits 12 – 16 are not used.

The CPU uses the information contained in these input bits to uniquely identify the module, and to monitor its Board Ready and Terminal Block status.

The module reports input point data in bits 17 - 48.

Input Status Bits			
Input Group 1	*Input Group 2*	*Input Group 3*	*Input Group 4*
Bits 17-24	Bits 25-32	Bits 33-40	Bits 41-48

Output Data: MDL660

The module receives 16 bits of output data from the RX3i CPU. Bits 0- 8 contains the filter time configuration data as shown below. Bits 9 - 16 are not used.

Binary Value in the Output Reference Bits	***Filter Time***
0000	0.5ms
0001	1ms
0011	2ms
1001	5ms
10011	10ms
1100011	50ms
11000111	100ms

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
