GMSVO7 single board computer

General Micro Systems GMSVO7 advanced single board computer is now available from UECS.

This high-performance CPU for the VMEbus provides ultra-high speed data movement, delivering the performance of a minicomputer at a fraction of the cost. Based on the 32-bit 68020 running at 20 MHz, it features up to 1Mbyte no-wait-state RAM, optional advanced memory management and high-speed floating point maths. A real-time clock calendar is standard. Mezzanine options provide VSB(MVMX32) compatibility, as well as a wide range of I/O possibilities. All system configuration is software-controlled, minimising the need for straps and jumpers.
