VARIAC®

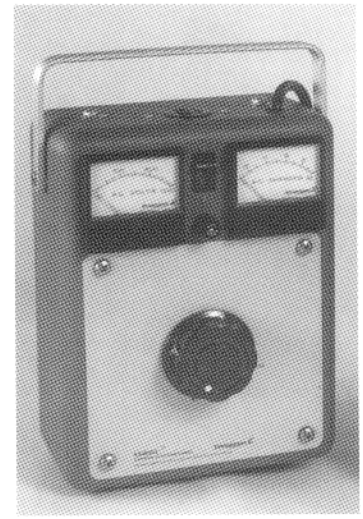

PORTABLE ENCLOSED MODELS

Portable, metered or unmetered cased units are available in many models for laboratory and test bench applications. Each unit consists of a variable autotransformer and an overload protector.

A voltmeter, ammeter and/or wattmeter is available on some models.The output circuit is protected by either a thermal overload protector, resettable from the front panel or by easily accessible and replaceable fuses.

Shielding is provided to reduce stray fields sufficiently to provide an overall accuracy of 3% of full scale.

A double pole on-off switch interrupts both sides of the AC line. Where dual range meters are used, make before break range switches permit switching under load. A convenient carrying handle is provided on all models.

SINGLE PHASE, 120V, 50-60Hz INPUT
