General Standards Corporation

High Performance Bus Interface Solutions

Cable Interface Module

Compact and reliable transitions between high density connectors and high quality spring loaded terminal blocks. Modules are 2.88" in width (length varies depending on part number) so they can be mounted in standard DIN rail fixtures. Terminal blocks accept 18 - 26 AWG wire.

Ordering Information

If screw-clamp terminals are needed instead of the spring loaded terminal blocks, add a -1 to the end of the part number. For example the part number for a Cable Interface Module with screw-clamp terminals for the PMC-HPDI32A board would be CBLIFMOD-PMC-HPDI32A-1.

Terminal	Specify option as:
Screw-Clamp	-1
Spring loaded	0 or Leave blank
