Series TM Mantles for Spherical Flask

[See alternate views](#)

Overview	Prices & Specs	Application	Options	Accessories
<p>Heating mantles are preferred to Bunsen burners or hot plates for organic liquids. They provide even heating (no hot spots) and maximum surface coverage for better temperature uniformity. The Series TM spherical flask mantle covers only the flask's bottom half, letting you see its full contents. Larger sizes have multiple circuits for ease of temperature control when a flask is less than half full. Aluminum Housed Mantles Feature:</p> <ul style="list-style-type: none"> • Rigid housing provides strength and durability while supporting the weight of the vessel • Fabric interior to softly nest glass vessels to reduce the chance of thermal shock and damage to glassware • Withstands 450°C internal operating temperature • Feet on smaller sizes designed to provide stability and promote cooler exterior temperatures 				

Series TM Mantles for Spherical Flask

Certification: All 115-volt items are CSA certified. TM 122 also CSA certified.

Electrical: TM94 through TM118 detachable 4-ft., 3-wire cord and locking connector.
TM120 and TM122-terminal box.
