SKU: N/A Category: SECTION 3

Description

Description

Huntington Mechanical Labs is pleased to present our updated selection of**Gate Valves**, in both Manual & Pneumatic operation. Standard sizes range from 5/8" to 6" with other sizes and/or options available for quote.

Manufactured by Huntington at our plant in California, USA, we utilize premium materials with robust construction to deliver high quality valves at competitive prices. Our valves feature a smooth, quiet operation of the gate carriage that eliminates the "popping" sounds from other manufacturers. When you need top-notch quality and support after the sale you can rely on us!

NOTES: Pneumatic versions available with No Solenoid, or a choice of 12VDC, 24VDC, 110VAC or 240VAC Solenoids. Both CF and ISO flanged models available with rubber seals, CF flanged models are also available with copper seals for higher Torr rating or use in challenging environments. (CF = Conflat Style, KF or ISO = DIN Style)

Maintenance Manual for Gate Valves can be downloaded HERE
