Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

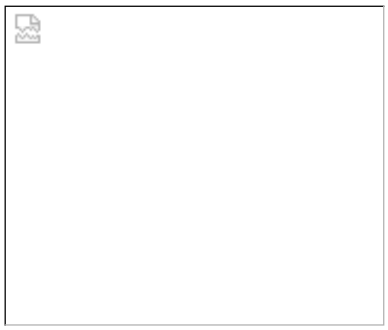

Expert team | Trust guarantee | 100% satisfaction

Our Products - Satellite 200 - Thermal Printing

| About This Product | Customization | Specifications |

A precision flat-bed recorder for medical instrumentation. Convenient, real-time trace inspection. Based on the AR-200 print engine.

- Simultaneous recording of up to 32 overlapping traces, with 12 lines of floating annotation
- Chart speeds continuously variable from 1 mm/hr to 100 mm/sec
- Parallel (Centronics-compatible) interface card includes built-in buffers to minimize host's CPU time and permit buffering of Windows input data
- Development Kit available

Thermal Printing Products

Satellite Recorders

GSI Lumonics' unique Satellite recorders are separately-packaged, free-standing units designed for convenient use with a broad variety of portable and stationary instruments. Utilizing the same high-performance print engines that are built into many of the world's leading medical equipment, Satellites are used to retrofit instruments that are already designed and/or built, to provide output where instrument cabinet space is too limited to permit recorder installation, or when in-house design time and/or facilities are limited. All models feature automatic curve smoothing, continuously-variable chart speeds and convenient, easy-loading Z-fold chart paper. Each recorder is furnished with all necessary regulatory approvals.

Customization

Customization GSI Lumonics' standard thermal recorder models are designed to meet the needs of many OEM users, virtually off the shelf. Frequently, however, instrument manufacturers approach us with special hardware and/or software requirements, and over the years, GSI Lumonics has built a solid reputation for responding effectively. Custom recorders, ranging from standard units with only minor configuration changes to major modifications and even complete instrument re-designs are routinely handled. Our Engineering and Production Departments are uniquely organized to react rapidly and efficiently to special needs. Designs, prototypes and even relatively short production runs can be completed with surprising speed and efficiency.

SPECIFICATIONS —Satellite 200 (Includes AR200P)

Mechanical/Electrical

Paper Type:	Z-fold
Paper Capacity:	300 feet
Weight:	9.50 kg
Overall Dimensions: LxHxW	16.80" x 5.00" x 11.00"
Case Color:	PMS cool gray 2C/4C
Input Power (max.):	90W
Print Supply:	90-240 VAC (50-60 Hz)

Output

Printing Method:	Direct Thermal
Resolution:	Y-axis: 203 dpi (8 dots/mm) X-axis: (up to 25 mm/sec) 800 dpi (32 dots/mm) X-axis: (>25 mm/sec, <50 mm/sec) 400 dpi (16 dots/mm) X-axis: (>50mm/sec) 200 dpi (8 dots/mm)
Overlapping Traces:	32
Trace Options:	4 widths; envelope mode; dashing; scaling
Real Time Annotation:	12 lines (max)
Grid:	Standard and User-defined
Background Text:	Horizontal or vertical orientation
Background Graphics:	All dots addressable

Regulatory Approvals

IEC-601-1
FCC Class B
UL 544
CE Mark
