Model A-1010B Lamp Housings

The A-1010B's sealed housing requires no ozone venting, and 75 watt arc lamps require no water cooling. The integrated arc lamp igniter is completely RF emission free. And the compact design occupies very little bench space.

Thanks to its proprietary thermally-matched optics, the A-1010B boasts the lowest price per watt of optical power output available. Since a 75 or 150 watt lamp delivers roughly the equivalent optical output of a 450 watt lamp, lamp replacement cost is cut in half.

See the General Information page for more details on this product.
