ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Overview

High Speed 8-port PCI Intelligent Serial Controller

Maxspeed continues to sell, develop and enhance the line of intelligent multiport serial controllers that first got the company started. The company currently offers a complete line of controllers for all remote access, multi-user, instrumentation, and serial peripheral needs that require no address or jumper settings and can operate at speeds up to 230 Kbps simultaneously on all ports. Supported under most PC operation systems, Maxspeed's SS (ISA bus) and PS (PCI bus) intelligent multiports are used in many different industries, from very large communications, embedded systems, and retail accounts, to many small and varied vertical markets.

Features

Economical Performance and Speed
The RISC architecture of the PS8 gives you high speed, reliable throughput with absolute minimum host overhead under any conditions. All ports can operate at their maximum throughput of 230 Kbps (sustained rate) simultaneously, with or without hardware handshaking (RTS/CTS, XON/XOF).

Easy Access & Installation
The PS8 controller is a short PCI card that slides easily into any available location, and is immediately recognized by the operating system. It requires no IRQ's, DMA's, jumpers or special I/O addresses

Applications
The PS8 is ideal for your most demanding high speed communication needs under many operating systems. Use it for RAS (remote access services), modem or fax pools, data acquisition, remote file transfer, industrial control, wide area networking, or any serial peripherals. Expandability Multiple PS8 controllers may share one 8K memory area without any performance degradation. To expand further, consider the PS16, PSRack or one of Maxspeed's ISA controllers.

Expandability
Multiple PS8 controllers may share one 8K memory area without any performance degradation. To expand further, consider the PS16, PSRack or one of Maxspeed's ISA controllers.

Specifications

- Ports: 8
- Baud Rates: up to 230 Kbps
- Aggregate: 1840Kbps
- Host Mem.: 8K
- Flow Control: XON/XOF,RTS/CTS
- Bus: PCI
