CONTACT US

8800 Series

In order to input the signal from an optional extensometer or other strain transducer, it is necessary to have a strain channel fitted to the 8800 controller.The strain channel provides excitation and signal conditioning for strain gauge and LVDT devices and can also accept high level 0-10V analog input signals.

Two versions are available, one for monitoring only and one for monitoring and control.Required for strain input to FastTrack 8800 controllers from optional strain measurement transducers

PRINCIPLE OF OPERATION

The strain channel provides excitation and signal conditioning for strain gauge and LVDT devices and can also accept high level 0-10V analog input signals.

Two versions are available, one for monitoring only and one for monitoring and control.

APPLICATION RANGE

In order to input the signal from an optional extensometer or other strain transducer, it is necessary to have a strain channel fitted to the 8800 controller.
