

ARTISAN®
TECHNOLOGY GROUP

Your **definitive** source for quality pre-owned equipment.

Artisan Technology Group
(217) 352-9330 | sales@artisantg.com | artisantg.com

Full-service, independent repair center
with experienced engineers and technicians on staff.

We buy your excess, underutilized, and idle equipment
along with credit for buybacks and trade-ins.

Custom engineering
so your equipment works exactly as you specify.

- Critical and expedited services
- In stock / Ready-to-ship
- Leasing / Rentals / Demos
- ITAR-certified secure asset solutions

Expert team | Trust guarantee | 100% satisfaction

Hardware Debuggers

visionICE II

visionICE II utilizes on-chip debugging services embedded in the microprocessor. visionICE II not only offers entry-level system debugging features, but now comes standard with full 10/100BaseT Ethernet for full networking capabilities.

visionICE II features include:

- Real-time target control
- Standard TCP / IP networking
- Scalabilty
- Flash memory programming
- Trigger In / Out
- Master / Slave support
- Additional custom registers

For a full list of features and specifications see our visionICE II datasheet.

visionPROBE II

Designed specifically for software developers, visionPROBE II provides a high-speed parallel connection between a host debugger and target microprocessor for PC-based development.

visionPROBE II features include:

- Target versatility
- High-speed parallel download
- RTOS awareness
- On-chip debugging target control
- Built-in hardware diagnostics
- Flash memory programming
- External triggering
- Source-level debugging
- Internal register configuration

For a full list of features and specifications, see our visionPROBE II datasheet.

Architecture Training

Wind River offers a number of MPC8260 training seminars led by embedded engineers, including:

MPC8260 3-day Training

Wind River, in association with Motorola, is

Software Solutions

visionCLICK

visionCLICK is designed for systems engineers ands software developers responsible for debugging, testing and tuning embedded microprocessor applications, diagnostics and device drivers written in C / C++ or machine language.

The newest revision of Wind River's premiere source-level debugger now includes:

- An RTOS API kit to give developers using previously unsupported or custom RTOSs the ability to quickly integrate RTOS-aware debugging capabilities.
- Advanced trace features, including trace-function profile with visionEVENT.

visionXD

Wind River gives UNIX developers what they want - a source-level debugger designed from the ground up for UNIX workstations.

visionXD features include:

- Easy project configuration
- Powerful, high-level breakpoints and events
- Source browsing
- The ability to monitor high-level variables

visionWARE

visionWARE is an Open Framework consisting of a cohesive set of highly integrated modules that can be included in your embedded design, reducing the amount of software you have to develop.

Reference Designs

Modular development platforms and single board computers with schematics enable engineers to evaluate new silicon, prototype

pleased to offer technical training for the MPC8260 microprocessor. This 3-day course has been designed for firmware, hardware, and system engineers, and is lead by a qualified instructor with comprehensive knowledge of the PowerQUIC II.

MPC8260 Familiarization

This free 1-day training seminar is a subset of our 3-day PowerQUICC II training, and is intended to provided insight on how to design with the MPC8260; what you need to know about the chip; how to use it; how to get started; and useful information sources you will want to use.

MPC8260 Online Training

Modeled after the 1-day course, this tutorial is provided free on our website, and covers the basic aspects of the MPC8260.

Artisan Technology Group is an independent supplier of quality pre-owned equipment

Gold-standard solutions

Extend the life of your critical industrial, commercial, and military systems with our superior service and support.

We buy equipment

Planning to upgrade your current equipment? Have surplus equipment taking up shelf space? We'll give it a new home.
