Embedded Support Tools Corporation

visionPROBE

EST's On-Chip Software Debugger for Motorola PowerPC™, 68K, and ColdFire® Microprocessors

Designed specifically for software developers, visionPROBE gives you the download speeds and features you need to cut critical development time.

With download speeds 20 times faster than our competitors, and the new visionCLICK 7.2 debugger, visionPROBE is one of the most valuable tools your software team can have.

Fully compatible with the new visionCLICK 7.2
Increasing the power and flexibility of visionPROBE, it is now fully integrated with the newest release of visionCLICK.

visionPROBE is also compatible with a number of third party tools including Wind River's premiere development environment - Tornado II.

visionPROBE Features

The visionPROBE debugging cable comes with features such as:

High Speed Parallel Download - download speeds in excess of 450 Kbytes/Sec. for PowerPC 8xx/5xx targets.

RTOS Awareness - obtain detailed information on any RTOS object.

Target Control via On-Chip Debugging - without hardware or software intrusion.

Built-in Hardware Diagnostics - including a comprehensive suite of RAM tests, bus tests, scope loops, and CRC checks.

Flash Memory Programming - a complete library of turnkey algorithms for programming Flash memory devices.

Statistical Performance Analysis - samples
